**Streamlines
vendor management
processes**

**Ensures compliance
and improves due
diligence**

**Provides centralized,
easy access to
vendor data**

Business Challenge

This Solution Template targets the fragmentation of information and documentation across systems by centralizing data in one accessible database. It manages the complexity of supplier relationships, offers customizable categories and capabilities, and maintains due diligence to improve visibility and compliance.

Customer Benefits

This cutting-edge tool simplifies vendor selection and monitoring, ensuring compliance and streamlined documentation. It features efficient searches, effortless tracking, and centralized data management, all accessible to vendor representatives, creating a seamless, enhanced user experience.

Special Features

1. **Vendor Audits' Workflow:** Focused on the Vendor entity, this feature governs statuses and related details, forming the core of our vendor management platform.
2. **Issues' Workflow:** Allows manual or automatic issue raising based on audit results, such as ‚Failed‘ or ‚Deadline missed‘ statuses.
3. **Permission Matrix:** Empowers assigning varied permissions across different employee & user groups including readers, qualified personnel, vendor representatives, and administrators.
