# Using Solution Templates to build a new generation of software solutions

When a new **software solution** is needed on short notice to resolve a **specific business issue**, cplace **Solution Templates** are a quick way to get there. As **solution patterns**, they can kick-start the process of making an innovative business app available in **record time**.

Developed jointly with business experts, external partners and global players in various industries, Solution Templates are a pool of **ready-to-use software solutions** for **project and portfolio management** applications.

## What sets a Solution Template apart from off-the-shelf software?

Based on **No-Code** and **Low-Code** programming, Solution Templates can be easily customized by business users without requiring any coding skills in most cases.

cplace gives enterprises the technology to simply and flexibly adjust existing software to meet new requirements, today and in the future. The cplace platform makes it easy to combine and extend any existing solution components as required.

## Strategy Manager

Maintain an overview of all strategic initiatives and change projects across the enterprise.

## Risk Manager

Control your company's risk exposure effectively by implementing agile action management and workflow-based user engagement.

## Collaborative Scheduling

Benefit from classical project scheduling enhanced by innovative components that give users more flexibility and autonomy.

# cplace Solution Templates

### Digital Board

Offer distributed teams Kanban-based, collaborative task management through the Digital Board.

### Objectives and Key Results (OKR)

OKR supports the management framework, helping teams work on common goals in a more agile and transparent way.
