Next-Generation Project and Portfolio Management

Work as quickly and flexibly as in Excel - with the power of an enterprise solution

Use cplace as your launchpad into the future of project and portfolio management (PPM) - today! Mix and match powerful apps and solution components to create custom software applications in record time and directly boost the efficiency of even the most complex projects.

Project and portfolio management using cplace

cplace is the first platform capable of fully reflecting every detail of your real-life project world. Set new standards where you need them while giving users the freedom to work the way they prefer within their teams wherever possible. Rely on a common data basis to provide up-to-the-minute, orchestrated information that can be reported on at any time.

Create your own mix of methods

- Collaborative project management
- Agile methods
- Classical methods
- Hybrid project management

More efficiency at top speed

cplace provides a collection of ready-to-use solution components from the PPM domain. Combine them as needed to extend your solution ecosystem whenever your process requires it.

The cplace platform is the common foundation of all cplace applications, interlinking the individual solutions like building blocks.

It was the unique combination of functionality, flexibility and expandability that made us decide in favor of cplace. No other solution we had considered offered these benefits.

Christoph Heinemann,
Continental Tires Germany

Start fast, customize as you go

Get the right software solution to tackle every business challenge! In addition to the pool of ready-to-use apps and *Solution Templates*, cplace comes with a wide range of simple customization options, allowing enterprises to **purpose-build software for their specific application scenarios**, today and in the future.

Trained key users in all roles and at all skill levels can be given access to powerful configuration options if so desired. Implement change requests in-house without depending on the developer and without having to wait. cplace enables every user to create their own personal, easy-to-use work environment.

Solution Templates

the kick-start for your cplace solution world

- Risk Manager
- Essential SAFe
- Strategy Manager
- Digital Board
- Collaborative Scheduling
- Hybrid Scheduling
- Product Roadmap
- Lean Portfolio Management
- Committee Manager
- ...and many more

[Learn more](#)

This saves time and costs while demonstrably improving project performance and enhancing employee satisfaction.

Benefit from exceptional flexibility by:

- using flexible options to expand or reduce the range of available cplace features
- customizing solutions to suit individual requirements
- using powerful work environments and dashboards optimized for specific user roles

Premium Applications

high-performance products that map complete use cases

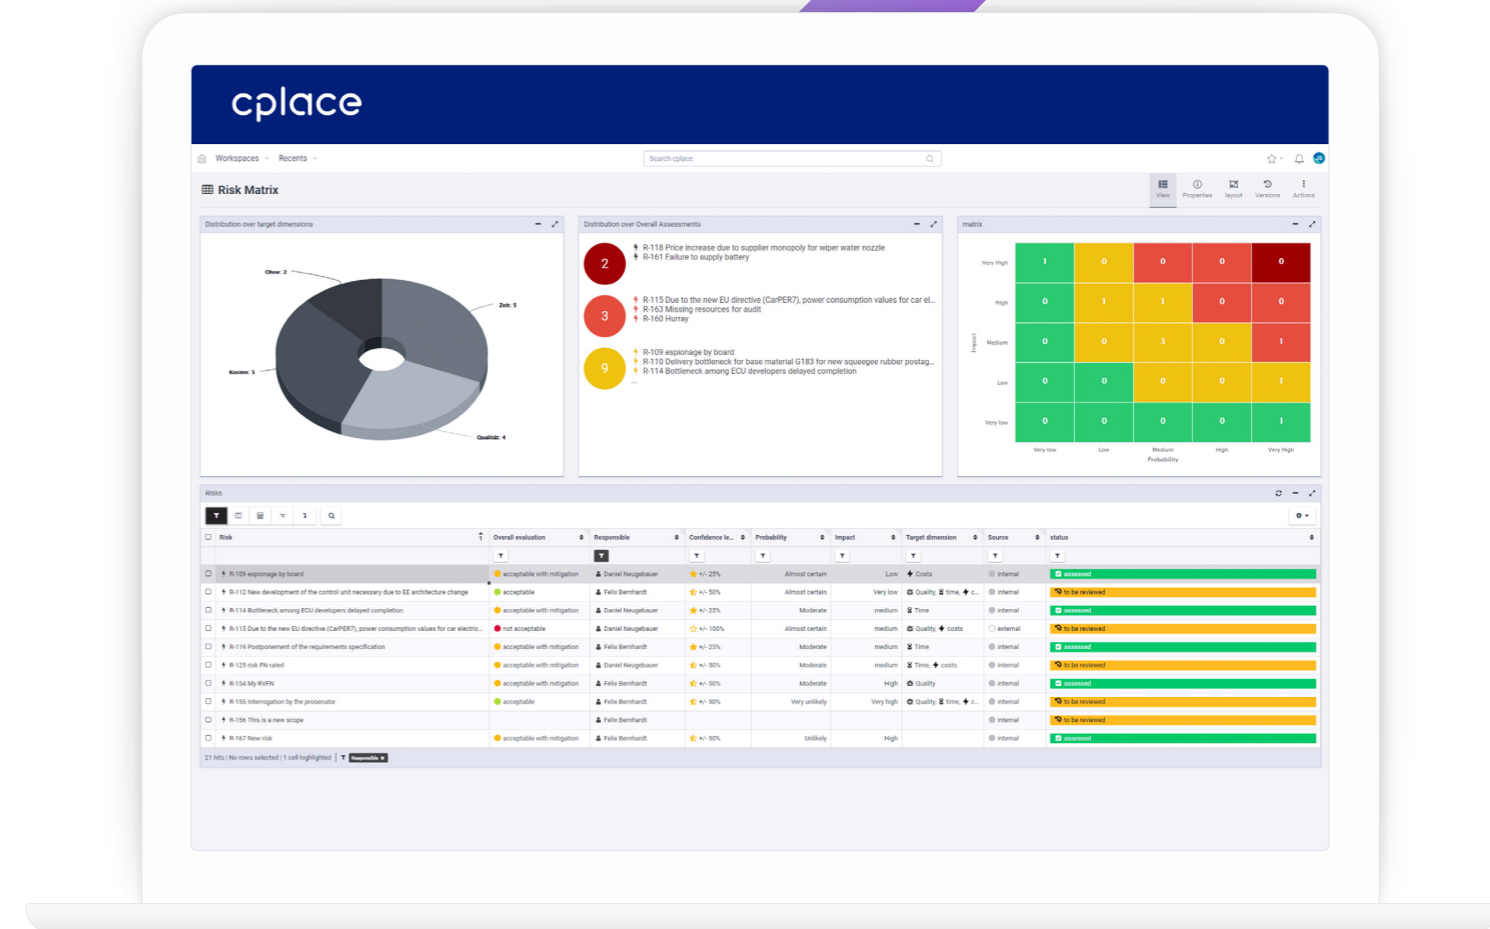

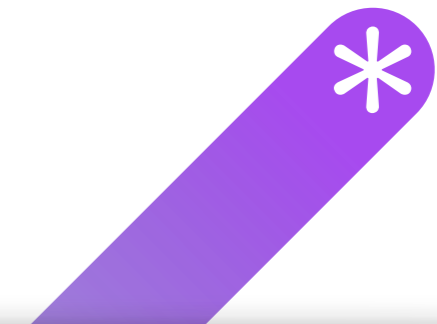

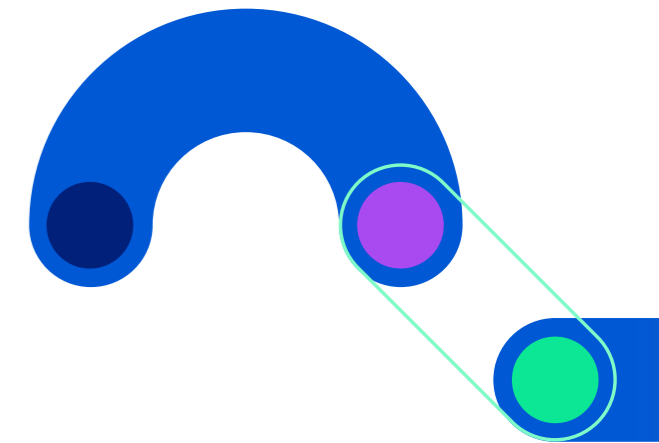

- Enterprise Scheduling
- Enterprise Board
- Visual Roadmap
- Cost and resource management with CURVES
- Complexity management with LOOME0

Speed up your digital transformation

cplace gives enterprises the technology they need to keep up with today's fast-paced markets. cplace allows them to integrate project-related information with higher-level company management processes, all on the same, common platform.

As a consequence, cplace accelerates internal and cross-company collaboration, for example in strategy and change management projects or joint ventures.

Safe, integrated and scalable – at the enterprise level

cplace is used by many market-leading enterprises, including all German carmakers. cplace meets the requirements of major enterprises in terms of centralized data management, roles and access privileges, data and information security, updatability and maintainability.

Furthermore, cplace ensures safe, scalable integration with your existing IT environment.

The platform enables easy data exchange with many standard software solutions, such as SAP, Microsoft Office or Jira.

cplace lets users see exactly the data that is relevant to them, presenting information geared towards specific user roles, whether as a milestone in a Gantt diagram, as a to-do item in a task list, or as an aggregated indicator on a dashboard.

With cplace, not only an innovative PPM platform but also a new way of working is taking hold at Roche – agile, lean, collaborative, and fast. cplace is a software for all users, not only for PPM experts.

Different modules support different ways of working and methods in the company. Thanks to the uniform data basis, not only can the individual teams plan and control their projects better – collaboration across departmental boundaries also becomes easier and more efficient.

And that's just the beginning: All users are still invited to make the solution their own and contribute new ideas and requirements that we can implement in-house. This will ensure cplace remains a perfect fit for our needs of tomorrow.

Head of Business Enabling, Oncology
Hoffmann-La Roche Ltd

Company Profile

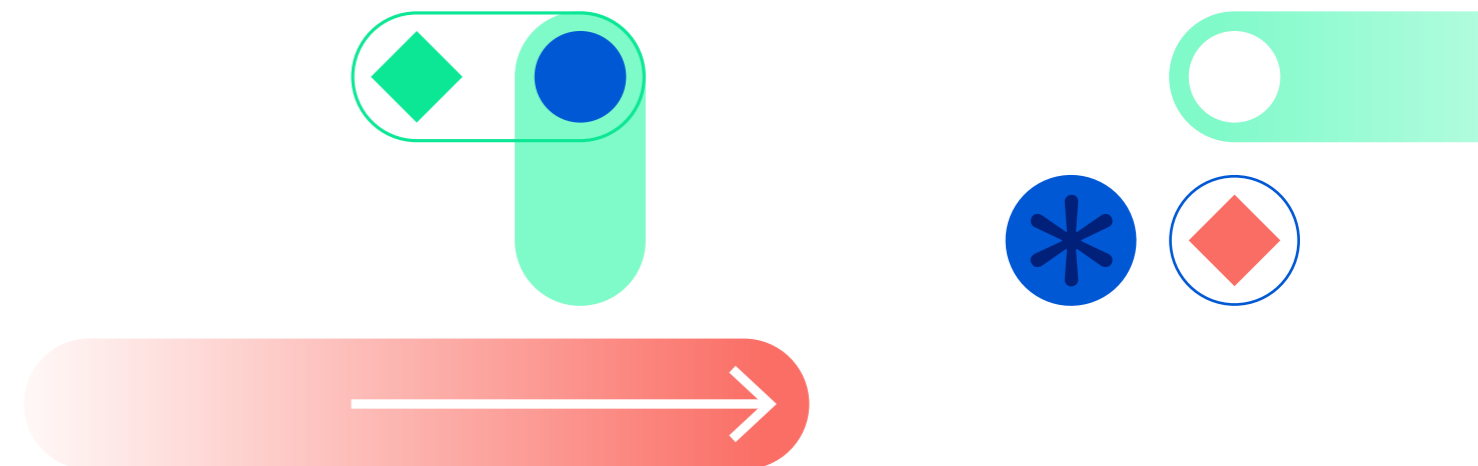

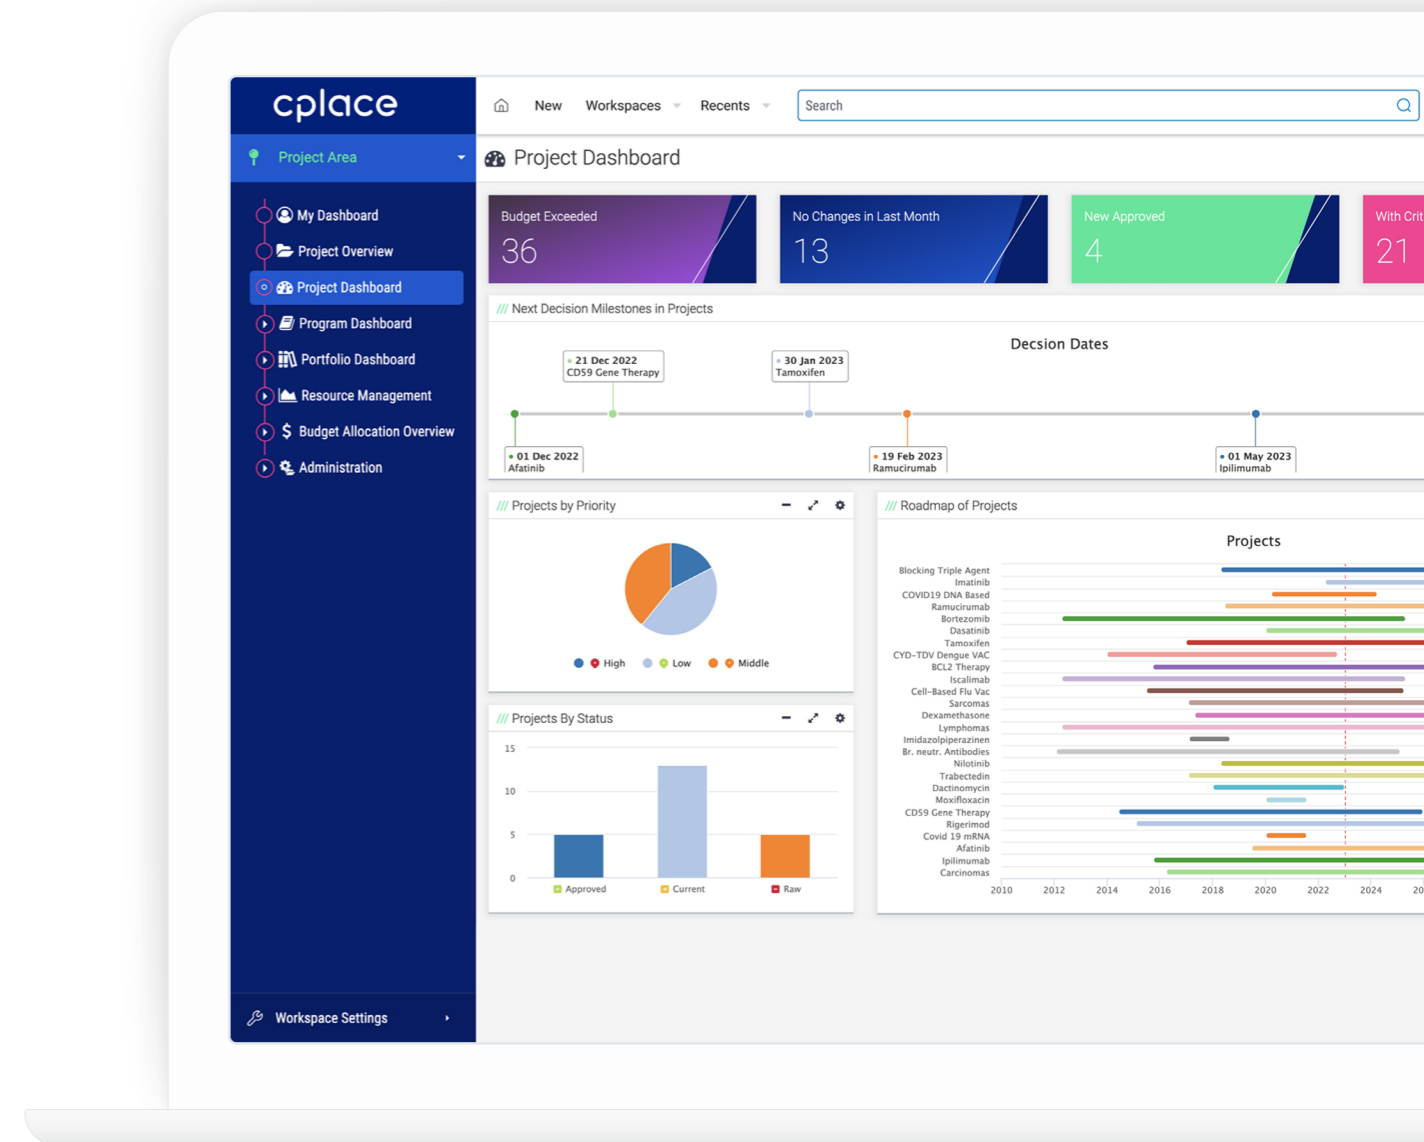

collaboration Factory has made it its goal to strengthen the collaboration of companies in communities, to open application development to all user groups, and to offer highly flexible solutions for Next-Generation Project and Portfolio Management.

collaboration Factory AG is a global provider of business software solutions. It was founded in 2014 by project management pioneer Dr. Rupert Stuffer with the intention of radically renewing the market for project management software. collaboration Factory aims to strengthen enterprise collaboration in communities, to open application development to all user groups, and to provide highly flexible solutions for Next-Generation Project and Portfolio Management.

In cooperation with a high-caliber community of experts, collaboration Factory helps companies across all industries plan and manage complex projects and processes and drive their digital transformation.

Customers include all the major German automotive manufacturers as well as well-known market leaders in the sectors of automotive engineering, aerospace, the pharmaceutical industry and many more. These customers use cplace to control business-critical processes in the areas of project management, product planning, strategic portfolio planning, and risk management. Large enterprise customers use cplace to support tens of thousands of knowledge workers.

In recent years, collaboration Factory has been awarded the German Founder's Award and Deloitte's "Technology Fast 50" award.
